I am 23 years old, enthusiastic, hardworking and honest. I enjoy hands-on interactions and socialising with others. I work well within a team or on my own and am always willing to accept responsibility and extra work assignments.

Leaving school in 2011, I was employed for four years as a fish vaccinator, travelling to fish farms across Scotland, Norway and Denmark working with teams of vaccinators on 12 hour shifts. In this role I proved myself to be an enthusiastic and hard-working team player, able to maintain good relations with both colleagues and customers in often demanding circumstances. During this time I took a 6 month break to travel around south east Asia visiting Thailand, Cambodia, Malaysia, Burma, Vietnam and the island of Borneo. During this time I also trained and completed my PADI dive-master Certification. This experience gave me great confidence and independence, working and living with people of all walks of life and culture. I was given the opportunity to go to Tasmania with another company in 2015, where I worked a 6 week contract and later spent 7 months travelling Australia where I picked up work as I went.

I love socialising and meeting new people in my day to day life. I love a challenge and new experiences. I am very practical and have a flare for creativity which allows me to get round problems

## **Work Experience**
