Experience

❖ **Supply Chain Coordinator – Penske Logistics**

○ April de 2017 - Present

Responsible for implementing the leading logistic provider concept in a retail/food inbound sector (Penske first in Brazil).

Responsible for conducting and organizing the tracking process, operational KPI's and optimization of inventory and logistics

Participation in the OTM implementation process as a logistical optimization tool.

Focus on stock optimization, road transportation, cabotage transportation and process improvement.

Aimed not only at financial gain but also at equalizing the supply chain process from supplier to the client.

❖ **PPCP Senior Analyst – Grupo Pao de Acucar**

○ September 2015 – March 2017

Conduct robust and detailed analysis to understand macro space performance and trends.

Draw accurate and practical conclusions from data analysis to inform store ideal frequencies with the lowest cost possible.

Review and identify opportunities for further process improvement.

Conduct the measurement and reporting of Space KPIs.

❖ **Logistics Intelligence Internship – Grupo Pao de Acucar**

- September 2014 – September 2015

Responsible for conducting analyses on:

Occupation and expansion of distribution centers according to the forecast of demand fluctuations throughout the year and seasonality.

Feasibility study of new distribution centers, considering geographic positioning, operational cost and logistics cost.

Feasibility of implementation of advanced logistics units.

Expansion and viability of the logistics network.

Study of layout and improvement of processes from receipt of cargo in the distribution centers to the unloading in store.
