Profil

*I am a positive and approachable women from Norway with good experience in marketing and branding. I find myself outgoing, creative and independent. I communicate well with people and love being social. I have always had an entrepreneur in me and love building up a corporation from nothing to success. In Norway I have my own **two companies** running a beauty concept consisting of my own beauty salon. As I am also one of Norways best microblading technicians and therefore I travel all around Norway and arrange training courses. From this I have developed my own product line and my very own webshop. As WOWBROW became a **success**, I now have **6 employees** in Norway. From this we just started a mother branch in our company with does import of beauty treatment machine called Skinlift 360.*

Last year our revenue in WOWBROW was 2.2 million NOK with only 2 employees. And we know this year that it will double.

Our new company is operating with much higher rates and we have an estimated revenue of 36. Million nok. Main purpose of the company is being a machine supplier, selling each machine for 30.000 nok eks VAT. Estimated sale per month is 100 machines. This is the reason for me applying for entrepreneur visa in Canada as I wish to open both WOWBROW and Skinlift 360 in your region. I already have good connections and people waiting for me to start the business cooperation with them. All on them are quite successful already today.

I do have abroad work experience with I believe is the reason for me being successful today. It has been an amazing journey and a learning curve I could be without.

I am also a mother of a lovely 2 year old boy which means the world to me.
