Tips

Protect yourself from phishing

Phishing uses fraudulent websites and emails to steal your personal data. Criminals gain information by sending you emails with links to sites that look like sites you trust and request you to click on these links to 'confirm' or 'update' your personal information. Be aware of requests asking for personal information (ID, ATM or PIN numbers), urgent appeals that your account may be closed if you fail to reply, misspellings and grammatical errors and not using your name and odd-looking URLs.
