Personal Skills

Accepting that the customer is always right

A product that is being built is intended for a client, and the ability to hear and fulfill customer requests is a remarkable talent.

Using existing frameworks

A habit to use libraries and databases not only saves time but at the end of the day opens a wide range of choices to get wonderful things.

Helping out colleagues

At this point one could talk about reverse flow. It is not only about using what has been created but also adding your projects to existing libraries and databases.

Personal deadline

Set a personal deadline for himself and leave enough time for making corrections and improvements.

Self- Learning

Every day learn new things, trying out new stuff, learning what works and what doesn't.

Master the art of responsive design

Media queries, Flexible images, Fluid grids.

Design with SEO in mind

A website's load time impacts SEO, along with how cleanly the site is coded and how the meta tags and descriptions are written.

Make content pertinent

Incorrect information, invalid hyperlinks, blank pages, or content on a page that has nothing to do with the rest of the page content.
